

Guidelines for Authors

Dear Author,

Thank you for accepting the invitation to contribute to the *Handbook of Cognitive Radio*. These short guidelines have been organized to simplify the process of preparing and submitting your manuscript(s).

This handbook project is part of Springer's prestigious Major Reference Works publishing program known as SpringerReference. Titles are published online-first and then in print using Springer's state-of-the-art editorial and publication platform, SpringerMeteor.

During the course of the project, you may consult the [Editor-in-Chief](#) or your [Section Editor](#) for queries regarding the content of your contribution. For aspects relating to format and structure and general queries, please contact me (your Development Editor for the project at Springer):

Audrey Wong

E-mail: audrey.wong@springer.com | Tel: +65 6396 6386 | Fax: +65 6298 8043

Up-to-date information including contacts, organization, and the aims and scope of the project is available at <https://meteor.springer.com/cognitiveradio>.

Submitting Your Article - On SpringerMeteor

Once you have completed writing your manuscript, please submit it online via '[SpringerMeteor](#)', Springer's submission platform for reference works. Use the token link given in your invitation to generate your password to log into the system.

Please keep the following in mind while preparing your contributions.

- 1. Scientific Level of Your Contribution:** Reference content is tertiary in nature, and therefore should not be written as a research paper or a review summarizing original papers. It should contain easily accessible, synthesized and established knowledge. Therefore, your contribution should be clear and concise and be a comprehensive and up-to-date overview of your topic. Also, define and explain all specialized terminology and avoid technical jargon whenever possible, as this work is aimed at undergraduate and postgraduates in the academics and professionals from the various disciplines and industries who are interested in applying knowledge of this work in their respective fields. Acronyms and abbreviations should be defined at first mention.
- 2. Length of Article:** 15,000 words (including references and figure/table captions)

Guidelines for Authors

3. Structure of Article

- Chapter Title
- Author Info (including co-authors: name, complete affiliation, city, country, e-mail address)
- Abstract (250 words)
- Keywords (5–10, for chapter metadata)
- Introduction
- <Main Text: Heading 1>
 - <Subheading 1>
 - <Subheading 2>
- Conclusion and Future Directions
- References (up to 50, *see Section 4, below*)
- Cross-References (*see Section 5*)

PLEASE AVOID:

- Footnotes or endnotes (including acknowledgments)
- Using the contribution's title as a header for any part of the text
- First-person usage (e.g., “our graph shows,” “we have,” “my team has”)
- Any form of brand promotion or advertising
- Adding your name and other parts of your affiliation into the running text. This metadata should appear at the beginning of the chapter and will be captured separately.

4. Citations and References

In-text citations should follow the **number** system, , e.g. (1, 3).

References: Please follow **Basic Springer style** while preparing your list of references. See following for example:

- **Journal article:** Smith J, Jones M Jr, Houghton L (1999) Future of health insurance. *N Engl J Med* 341:325–329
- **Journal article with DOI:** Slifka MK, Whitton JL (2000) Clinical implications of dysregulated cytokine production. *J Mol Med* 78:74–80. doi:10.1007/s001090000086
- **Book:** Smith J, Brown B (eds) (2001) *The demise of modern genomics*. Blackwell, London
- **Book chapter:** Brown B, Aaron M (2001) The politics of nature. In: Smith J (ed) *The rise of modern genomics*, 3rd edn. Wiley, New York, p 234–295
- **E-book:** Marius, A, Jonas, B (2012) Ionotropic glutamate receptors. Retrieved from <http://...> . Sarah, A, Julia, B (2010). *Neuromuscular junctions*. doi: xx-xxxxxxx
- **Online document:** Doe J (1999) Title of subordinate document. In: *The dictionary of substances and their effects*. Royal Society of Chemistry. Available via DIALOG. <http://www.rsc.org/dose/title> of subordinate document. Accessed 15 Jan 1999

5. Cross-References

Please login to the project website on SpringerMeteor to view the current table of contents. Include a list of related chapters from this handbook that may be of further interest to your readers.

Guidelines for Authors

6. Figures and Tables

- Color figures can be submitted. All figures and illustrations will appear in color online.
- There may be restrictions for color use in the print version; therefore, we advise that you create art that can be readily understood in both settings, e.g., using different line types (broken dashes and solid lines) as well as different color shades to plot lines. Please do not make reference to color elements in the text.
- Figures should always be submitted as separate image files in any one of these five standard formats: **JPG/JPEG, GIF, PNG, EPS, or TIFF**. The minimum resolution should be **300 dpi for photographs, 1,200 dpi for drawings**. Please do not use figures downloaded from the Internet as the resolution would not be high enough.
- Please indicate/include in your chapter text the following: 1) the placement of image files, and 2) an explanatory legend.

7. Index Terms

Please mark/highlight key terms – **ideally in green** – in your manuscript(s). The terms will be compiled for the index section in the back matter of the print edition.

8. Permissions

Authors are responsible for sourcing figures, obtaining the necessary permission to use them, and any associated fees. All figures and graphics should be original. While using figures/tables or any other material from other sources, please request permission from the copyright holder (usually the publishing house or author) to use them.

9. Deadlines

In order to publish this book as soon as possible and to keep all contributions up-to-date, please submit your manuscript within the **deadline** mentioned in your **invitation**.

10. Submission Platform

Upload manuscript files to the Web-based editorial and manuscript management system, [SpringerMeteor](#). For instructions on navigating the platform, refer to the [Meteor quick guide for authors](#). All submitted chapters will be reviewed for content and structure.

On behalf of the editor-in-chief and section editors of the Handbook of Cognitive Radio and Springer, we thank you for your contribution!
